

Managing risk

Not all risk is transferable to the insurance market, but instead needs to be managed in a practical way. This is where Oval Risk Services can help (Oval Risk Services is a division of Oval Insurance Broking Limited).

We have succeeded in obtaining from a selection of the insurance market funding or part-funding for risk projects that involve our client's in financial outlay.

Oval Risk Services

We have a team of highly experienced and qualified consultants who specialise in areas including:

Business Continuity Planning

- helping you plan for a major incident

Health & Safety

- ensuring compliance with regulation

Asset Protection

- security and fire prevention controls

Compilation of a Risk Matrix/Register

We can help you create a risk matrix or risk register that demonstrates that you have identified and quantified your key risks as a business, and recorded the measures put in place to control them. We can also translate this risk register into insurance programme design, a key step to ensuring your insurance coverage reflects your business.

Access to an outsourced consulting service to address the risk of fraud within your organisation, the principal elements of which include:

- An interview process to understand how the organisation as a whole operates
- A bespoke seminar to outline broad aspects of fraud and discuss results of interview process
- Paperwork trail identification and process review
- Production of a Board report and Fraud Prevention Manual

Post Fraud Forensic Investigation

If a fraud has already occurred this service can help you locate your money and recover it for you. Asset tracing is a specialist advisory service and merely a part of the wider exercise of investigating a suspected or discovered fraud. This service can extend to include examination of computers, questioned document examination and if required handwriting verification. In fact this service includes an investigation of all features commonly found in a complex fraud.
